Roee Tal

Game Developer — Unity

roeetal17@gmail.com · 053-337-4350 · Israel · roeetal.com · LinkedIn · GitHub

Summary

Game developer with a 3-year game design and development program at Tiltan and 1.5 years of professional real-time 3D development at 3DVision. Strong foundation in Unity and C#: modular, data-driven systems, event-driven gameplay and UI. Looking to bring my professional experience delivering client features and debugging and optimizing complex logic back to Unity.

Experience

Unreal Developer — 3DVision

Tel Aviv · 02/2025 – Present · Real-time interactive simulation applications for real-estate companies, built in Unreal Engine

- Develop and integrate interactive features based on client requirements across multiple projects
- Debug and optimize complex logic for stability and performance
- Implement custom UI elements and functionality tailored to client needs

Projects

Isometric Story-Driven Game — Unity · 3-week hackathon · 10/2023 – 11/2023

- Architected a modular dialogue system with ScriptableObjects for efficient, data-driven content
- Built complex UI interactions and event-driven mechanics (e.g., an OnLetterTyped event) to drive the narrative flow
- View project

Boss Rush: Grid-Based Tactical Combat — Unity · Producer & Game Designer · 12/2023 – 09/2024

- Led a cross-functional team of programmers and artists and managed the development pipeline through delivery
- Designed the core gameplay loop, tactical grid mechanics and overall game balance
- Resolved conflicts and blockers between team members to keep a smooth, productive workflow
- View project

FPS Stealth Level — Unreal Engine, C++ & Blueprints · 06/2024 – 08/2024

- Programmed core FPS mechanics: raycast-based shooting, recoil feedback and dynamic weapon pickups
- Developed enemy AI with detection logic and patrol routes to support stealth gameplay
- View project

Education

Game Design and Development — Tiltan School of Design and Visual Communication, Haifa · 10/2021 – 10/2024

Courses: C# 1–2, Unity Development 1–2, C++, Multiplayer, Unreal Development 1–2, Game Design 1–2, Game Production

Skills

- **Engines:** Unity, Unreal Engine (Blueprints, C++)
- **Languages:** C#, C++
- **Practices:** OOP, design patterns (event-driven architecture, data-driven design with ScriptableObjects), debugging and optimization, Agile
- **Tools:** Git, version control, asset management
- **AI-assisted development:** GitHub Copilot, OpenCode, ChatGPT, Gemini; local LLMs with Ollama and LM Studio; currently adopting Claude Code
- **Also:** game design, game production, VR

Languages

Hebrew — native · English — full professional proficiency
