Roee Tal

Game Developer

Experienced Game Developer with a strong foundation in Unity and C#, currently active in the Unreal Engine ecosystem at 3DVision. Proven ability to architect complex technical systems and solve intricate development challenges. Looking to bring my cross-engine proficiency, technical design skills, and passion for gameplay back to the Unity platform to build engaging gaming experiences.

Hebrew

Native or Bilingual Proficiency

English

Full Professional Proficiency

SKILLS

Object Oriented Programming | C# | C++ | Unity Engine | Unreal Engine | Game Development | Game Production | Agile Development | Software Integration | System Maintenance | Troubleshooting | VR Knowledge | AI | Git | Asset Management | Version Control

PROJECTS

Isometric Story-Driven Game (3 week hackathon)

10/2023 – 11/2023

Link to project

- Architected a modular dialogue system utilizing ScriptableObjects for efficient data
- Developed complex UI interactions and event-driven mechanics (e.g., OnLetterTyped) to enhance narrative flow

Boss Rush – A Grid-Based Tactical Combat (Unity)[as a producer & game designer]

12/2023 – 09/2024

Link to project

- Led a cross-functional team of programmers and artists, managing the development pipeline to ensure successful project delivery
- Designed core gameplay loops, tactical grid mechanics, and overall game balancing
- Handled conflicts and resolved issues between team members to maintain a smooth and productive workflow

Shooter Game (Unreal Engine)

06/2024 – 08/2024

Link to project

- Programmed core FPS mechanics including raycast-based shooting, recoil feedback, and dynamic weapon pickups using C++ and Blueprints
- Developed AI behavior and detection logic to support stealth mechanics and enemy patrol routes, showcasing expertise in Unreal Engine systems
